

“Moodle LMS for Instructors and Teachers”

(Three-Day Crash Course)

Overview

The **Moodle** Learning Management System (LMS) is a *free* software application for organizing learning materials, creating learning resources and activities, and more. Moodle is used in many education institutions worldwide. It helps teachers engage students in learning activities such as online discussions and quizzes, and make use of online resources. Moodle also has facilities for entering grades and generating grade reports. This crash course introduces teachers and instructors to **Moodle**. Participants learn how to organize and share course materials, to create quizzes, surveys and interact in online forums, and to enter and manage grades.
